

Annex<sup>TM</sup> Shower Rail with 2-Function Diverter  
Now Shipping

Annex is a perfect solution for "lite" remodels where the additional functionality of a hand shower is desired without wall reconstruction. Annex allows for two discreet functions: showerhead or handheld shower.

How does Annex stand apart from other systems?

- **More accommodating:** Annex doesn't alter the height of the showerhead; it can work in any existing installation without worry about ceiling height
- **More secure:** secure and flexible mounting system meets ADA pull-force requirements, up to 250 pounds
- **Easier to install:** 2 1/2" horizontal adjustability is wider than other shower rails to accommodate varying wall thicknesses
- **More flexibility:** Annex provides flexibility to create any shower arm, showerhead and hand shower combination
- **Many applications:** perfect for home remodels and hospitality renovations, as well as new construction for late-in-the-project changes

“Think ‘outside the wall’ for a simple – yet impactful – upgrade to the bath.”
