

## Floor-mount Tub Filler Training

Have you ever heard any of these complaints from your plumbers or clients?

I love the look of a free-standing tub and floor-mount tub filler, but my layout requires the tub next to the wall.

Tub fillers are a challenge to install and service, especially on concrete floors.

My tub filler isn't secure in the floor - it wobbles when I use the hand shower or turn on the water.

The design team at Moen listened to plumbers and consumers, and used these insights to engineer a best-in-class installation system appreciated by plumbers, and a tub filler that offers exceptional style and optimum flow rate for quick tub filling. The design community has also taken notice. The Moen Aris tub filler has received two recent awards — notably the 2015 ADEX Design Journal Platinum Award for Design Excellence and the 2014 Chicago Athenaeum GOOD DESIGN Award.

## Popular Décor Styles

### Modern – Aris®

Exposed pipes and industrial-chic finishes are just a few of the downtown loft-inspired details that come to life in the Aris tub filler, faucets and accessories.

- Single-handle lever makes it easy to adjust the water
- Single-function hand shower
- Chrome or LifeShine® Brushed Nickel finish
- Matching Aris lav faucets, showering and accessories for a completely coordinated bath

### Traditional – Weymouth®

Your clients can customize their selections for their own unique and distinctive bath.

- Cross or lever handles
- Wall or Floor-mount
- Chrome or LifeShine® Brushed Nickel finish
- Matching Weymouth lav faucets, showering and unique accessories

## Thoughtfully-Designed Innovation

### Installation

Moen's proprietary bracket system assures that the floor-mount risers and faucet remain secure and wobble-free for a premium fit and finish, considerably more secure than others in the market.

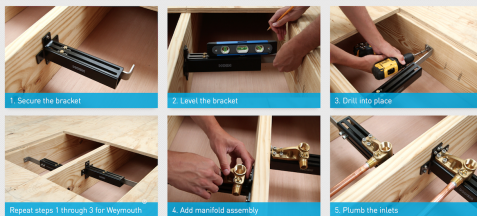

Aris® Single Floor-Joint Mounting Bracket

Weymouth® Double Floor-Joint Mounting Bracket

**NEW** Concrete Installation Bracket - Features a lower-profile bracket ideal to easily and securely allow for concrete installations.

Installation Is Easy and Intuitive.
