

New Product Introduction 2020

Smart Home Connected Products

MOEN[®]

Available Now

U BY MOEN™ SMART FAUCET

The adoption of smart technology in the home continues to grow exponentially, with smart speakers and corresponding voice integration in connected products gaining traction. Smart technology, especially in new home construction, is becoming a standard expectation for younger consumers who, along with homebuyers in general, have identified the kitchen as a primary area of interest.

To drive growth in this emerging segment and solidify our reputation as the leader in innovating smart fixtures, Moen® is introducing the new U by Moen™ Smart Kitchen Faucet.

Say Hello to Your New Kitchen Assistant:

The U by Moen™ Smart Faucet

Features & Benefits

THE SMART TECHNOLOGY ALLOWS FOR PRECISE COMMANDS:

- Voice-activated dispensing in metric or nonmetric measurements such as tablespoons, milliliters, ounces, cups, pints, liters, quarts, gallons
- Custom, pre-set temperature requests such as:
 - Exact: "105 degrees"
 - Generic: "Hot," "warm" and "cold"
- Combined metered and temperature requests
 - Exact: "1/2 cup of 105-degree water"
 - Generic: "2 ounces of hot water"
- User-customized presets that facilitate quick delivery of common tasks such as, "Tell Moen to fill baby bottle"

As the water temperature changes, the hands-free sensor on the faucet will evolve from blue, purple and red, indicating the system is warming up or cooling down to reach the desired water temperature. When the water is ready, the sensor lights will stop flashing and turn solid.

Users will know the command has worked as the voice assistant will reply indicating the desired activity has been completed and the flow of water will start or stop.

Fits Your Space Perfectly

U by Moen™ Smart Faucet technology will be available in the showroom on six of Moen’s most popular kitchen collections in all corresponding finishes. The lineup features a wide range of styles and finishes, so consumers can adopt smart home technology in the kitchen without ever having to sacrifice on style.

Features & Benefits

Flexible Controls, Any Way You Choose

USE ONE OF FOUR UNIQUE AND FLEXIBLE ACTIVATION CONTROLS:

Hands-free sensor

Voice

Handle

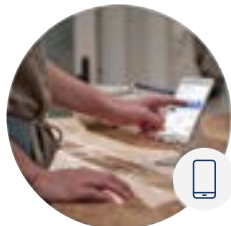

Smartphone app

More importantly, users can mix and match controls as a result of our open hierarchy design. This feature is a key competitive differentiator as the U by Moen™ Smart Faucet is the only voice-activated kitchen faucet on the market to offer voice and hands-free activation regardless of the faucet’s manual handle position.

AVAILABLE FINISHES

- Chrome
- Matte Black
- Brushed Nickel
- Black Stainless
- Spot Resist Stainless
- Brushed Gold
- Oil Rubbed Bronze
- Polished Nickel

A Personalized Experience

The U by Moen™ Smart Faucet provides users the ability to create personalized presets for common tasks. The smartphone app provides three different methods for establishing them, ensuring that the process is not only easy, but also gives the user exactly what they want.

“Show Me”

Don’t know precise temperature or measurements, no problem. Our innovative design allows users to determine both by opening and closing the handle to their own personal specifications.

“Tell Me”

Your favorite bread recipe calls for 2 ¼ cups of water at 110°. Simply set it up in the app and label it as you see fit.

“Usage History”

The smartphone app will show you historical use cases with exact measurements and temperatures. If you want to turn one of them into a preset, simply tap the specific use case and the app guides you through setup.

Additional Product Details

Works Smarter, with You

The U by Moen™ Smart Faucet works with your Amazon Alexa or Google Assistant smart speakers (covering +85% of the U.S. market) to understand a wide range of voice commands.

The Moen Smartphone App

With the introduction of the U by Moen™ Smart Faucet, we will also be launching a new whole-home smart water ecosystem smartphone application. This new app will provide a convenient and fast method for product registration:

- Include a unique, interactive step-by-step installation process
- Track recent and historical usage data
- Offer personalized settings
- Tips and tricks
- Allow for an unlimited number of customized presets

The iOS/Android smartphone app will be available as a free download from both the Apple App Store and Google Play Store.

Streamlined & Battery Powered

Product installation is DIY friendly and consistent with other digital kitchen products that Moen offers. The U by Moen™ Smart Faucet is also powered by six included D batteries with an average life span of two years. Unlike competitive products, there is no need for a dedicated “non-switched” outlet, which can complicate installation and potentially add additional costs. Moen will offer an optional AC adapter for those looking to connect directly to a GFI-certified outlet.

FLO BY MOEN™

The Flo by Moen™ whole home water monitoring system offers peace of mind and puts homeowners in control over your home's water. Help prevent pipe leaks, and monitor usage with the Flo by Moen™ Smart Water Shutoff. And for what can't be controlled, Flo by Moen™ Smart Water Detectors sense moisture and notify the homeowner whenever there is a threat present. With convenient smartphone controls there are more options to keep protected.

Features & Benefits

Flo by Moen™ Smart Water Shutoff

The best way to avoid water damage is to prevent it. Backed by years of product development and industry leading technology, the smart water valve detects and stops leaks. From your toilet, shower or faucet, to the pipes in your foundation and behind your walls, the smart water valve monitors all of them so there's no surprises on your water bill or catastrophes when you come home from vacation.

- Smart valve monitors water, identifies leaks and alerts homeowners of these issues to protect the home
- Real-time alerts through the smartphone app help inform homeowners of water usage on a daily, weekly and monthly basis
- Features notifications for remote shutoff option for homeowner via mobile app and automatic shutoff if a catastrophic leak is detected in the home

Now Available

Flo by Moen™ Smart Water Detector

Providing an entry point into leak detection, the detector introduces consumers to the Moen ecosystem of connected products and encourages adoption of the Flo by Moen™ mainline smart water shutoff for true whole-home protection.

Features & Benefits

- Sold with either one or three to a pack, the detector is an affordable way to detect costly water problems
- Detectors can be used separately or in conjunction with Flo by Moen™ Smart Water Shutoff for whole-home protection
- Detectors can alert homeowners of issues outside of a plumbing system that the Flo by Moen™ smart water shutoff wouldn't catch; for example: basements flooding, washing machine leaking, hot water tank failures, etc.
- Detects leaks and water concerns from environmental and machine / appliance situations
- Able to detect freezing temperatures, high humidity and presence of water
