**MOEN®**

*Available Q3*

## CIA™ BATH SUITE

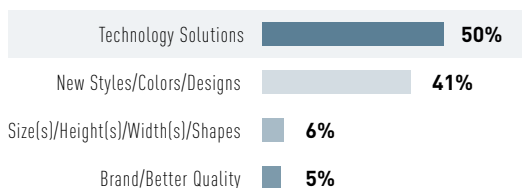

Moen®'s newest second upgrade bath suite, Cia™, is a highly distinctive collection that provides a broad décor style reach depending on its finish. With its name inspired by an elegantly lengthened C-shaped spout, Cia™ stands out from the linear horizontal designs featured in most modern faucets. The collection also introduces Moen®'s first one-handle lavatory faucet with single-sensor touchless activation featuring MotionSense Wave™ technology, allowing users to turn water on and off with the simple pass of a hand. Finally, Cia™ offers a new combination of matte black with optional brushed gold accents for an elevated aesthetic in the bath.

### Market Trend Information

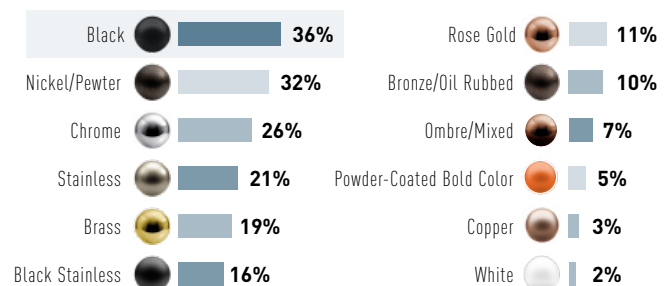

Consumers are looking for new technology, along with fresher styles, when purchasing a bathroom faucet. Although stainless tops the list for kitchen, black is the leading color for bathrooms. The Cia™ Touchless Lav Faucet offers both MotionSense™ technology, as well as a fresher style with the matte black/gold mixed metal finish.

#### What are some of the interesting new technologies you are seeing for bathroom faucets?

Source: NBKA Design Trends 2021

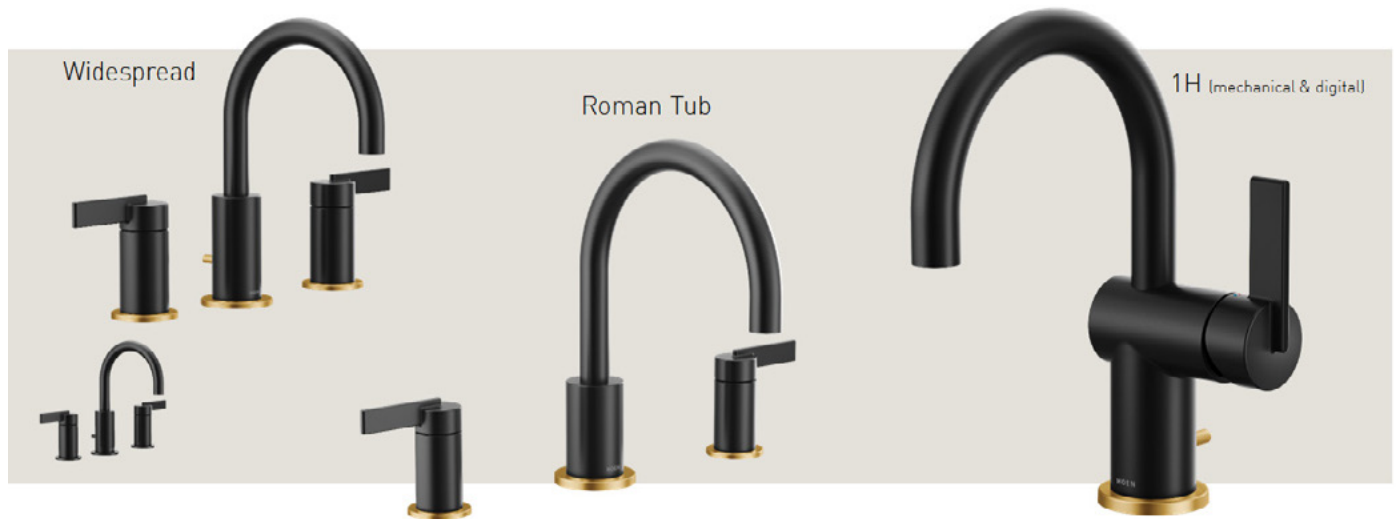

#### Which of the following bathroom faucet finishes will be extremely popular over the next 3 years?

## Style & Design

### NEW Mixed Material Option

For the first time, we are offering accent Brushed Gold escutcheons with select matte black platforms in this collection for an elevated aesthetic!

### Cia™ Style Collection Language

## Style & Design

### Cia™ Décor Style Targets

Cia™'s crisp details complement an array of contemporary design from luxe to soft modern to industrial chic, based on the finish selection. Cia™'s matte black finish works in industrial influenced designs and luxe modern spaces while brushed nickel and chrome finishes provide a soft modern or transitional style.

### Features & Benefits

- NEW touchless MotionSense Wave™ technology available on the one-handle lav faucet
- Brushed gold accents included with matte black lavs and Roman tub for alternate elevated aesthetic
- An array of finish options brings this collection across a wide range of modern styles – from luxe to soft modern to industrial chic.
- Broad reach across décor styles depending on the finish selected
- Deckplate included on one-handle lavs (both MS Wave and mechanical version)
- Vertical lift rod on mechanical offering and pop-up drain on touchless offering
- IMAP Protected

# M-CORE™ 2-SERIES

Moen® M-CORE™ Valve System is Moen®'s newest valve system designed with feedback from pro installers and Moen®'s desire to make their workday a little easier. It also gives consumers more freedom in terms of showering functionality and style in their new construction or remodel projects.

This year, Moen® is expanding the M-CORE™ Valve System with the introduction of M-CORE™ 2-Series. It provides temperature control functionality along with upgraded designs in second upgrade and premium collections. Like all M-CORE™ products, 2-Series trim offers additional flexibility when choosing the trim as these can be selected after the valve has been plumbed.

**M-CORE™ 2-series serves as a step-up from our Posi-Temp® product for both the plumber and consumer.**

## Features & Benefits

### 2-Series Trim

- Available in a wide range of styles and finishes for premium, second upgrade, first upgrade, and spec suites
- **Platforms offered include:**
  - Available in Eco Performance options only
  - Available in tub/shower, shower only, valve only configurations, as well as select no head platforms
- Does not come in an integrated transfer valve option
- Matching mixing and transfer valve trim handles
- Temperature control
- Pressure balancing functionality
- Precise temperature limit adjustment
- 1212 mixing valve cartridge is included with trim

### 2-Series 1212 Cartridge

- Temperature control
- Pressure balancing functionality
- Precise temperature limit adjustment

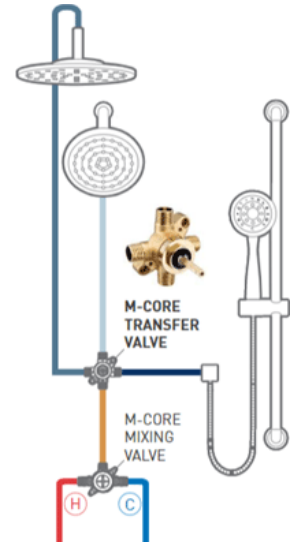

*Features & Benefits*

## M-CORE™ Transfer Valves

### Compatible with M-CORE™ 2-Series

- **Additional functionality**
  - 2 or 3 Function (U231) Independent
  - 3 or 6 Function (U361) Shared
- M-CORE™ Transfer Valves can control 2 or 3 showering devices
- Connection Types: CC/IPS, Crimp PEX, and Cold Expansion PEX
- **U361 Transfer Valve**
  - NEW: 6-Function: When using 3 showering devices, the valve has 3 independent and 3 shared functions
  - When using 2 showering devices, the valve has 2 independent and 1 shared function

## M-CORE™ Transfer Valve Trim

### Compatible with M-CORE™ 2-Series

- **Simplified Transfer Valve Trim offering**, one trim option will work with either the 2/3 (U231) Function or 3/6 (U231) Function valve
- M-CORE™ Transfer Valve and Trim are equipped with detents that allow for noticeable transition between functions
- M-CORE™ Transfer Valve Trim is available in all suite matching finishes, and has matching handles to Mixing Valve Trim, and Mixing Valve with Integrated Transfer Valve Trim

## SKU Numbering & Pricing

**M-CORE™ 2-Series is NOT a replacement for Posi-Temp®.** 2-Series is priced as the starting point in the M-CORE™ price progression and is priced lower than 3 Series

- An intuitive valve and trim numbering system makes ordering M-CORE™ universal valves an easy process.
- M-CORE™ 2-Series SKU numbers are copies of the corresponding Posi-Temp® SKU numbers with the addition of a "U" prefix.
- **U361 Transfer Valve**
  - Example: Align® Posi-Temp® Valve-Only Trim: T2191 = Align M-CORE 2-Series Valve-Only Trim: UT2191

### NUMBERING METHODOLOGY

U	.....Universal
130	...3-Port
140	...4-Port
231	...2/3F TV
